

" E.INS ECOSYSTEM OF INNOVATION FOR NEXT GENERATION SARDINIA"

HUMANISTIC CULTURE, CREATIVITY,
SOCIAL TRANSFORMATIONS, SOCIETY
OF INCLUSION

TARGET:

The general objective of the program is therefore to intervene on the system of small and medium-sized enterprises through the activation of a strong synergy between universities, research centres and the Sardinian business system to put the latter at the core of processes of co-creation of value and of technology and knowledge transfer.

To achieve this specific objective, the 10 Spokes, in collaboration with the Affiliates and those who have expressed an interest in being part of the Ecosystem, will create a complex of activities coordinated by the Hub, based on the monitoring of data and indicators, according to an evidence-based approach. Precisely this approach will allow us to act in a focused manner on some determinants of development that are pivotal for the positioning of the region within specific national and international markets.

The transfer of knowledge and skills through a strong link between research, businesses and the regional community will be fundamental.
